PRESS RELEASE

Retrofit of 1.400 school buses in New York has begun

New York, 01.08.2011: Last year HUSS won the bid for a large retrofit project for 1,400 school buses in New York. The project has begun. With HUSS service technicians and certified installation partners, HUSS brings the latest emission technology to the “yellow buses”. The program is scheduled to last for the next 2 ½ years. HUSS has already proven their capabilities and the advantages of the MK system in a smaller project of 164 buses for the City of New York. In order to be closer to the business, HUSS opened up an installation facility on Staten Island. The project which includes the retrofit and installation along with seven years of maintenance services has a value of nearly 20

MUSD. The New York Department of Education has internalized the importance of emission reduction and counts on HUSS technology. Diesel particles are harmful and can cause severe illnesses, as cancer and asthmatical diseases. Particle in that respect just have a size about a few nanometers. HUSS filters have a filtration efficiency of 99.9%.
